HIGHLIGHTS

Data publishing workshop

EDI is accepting applications for a data publishing workshop (4-6 June 2019) at the University of New Mexico. Information on how to apply is available [here](#).

Summary information of the workshop on “Next generation climate/hydrological data products” is available [here](#). The workshop (12-14 March 2019) was organized with the goal of developing a concept for harmonizing meteorological and hydrological data that are currently located in the [EDI data repository](#) and in the [ClimDB/HydroDB](#).

FEATURED DATA PACKAGE

EDI TECHNICAL INFORMATION & DEVELOPMENTS

EDI repository system upgrades

EDI's technical team is planning to upgrade all infrastructure servers with the latest Long

Term Support version (18.04) of the Ubuntu operating system (OS) during April. This upgrade will bring parity to all servers managed by EDI and will ensure timely OS updates, which bring both new features and security to the systems. More information is available [here](#).

UPCOMING WEBINARS, MEETINGS & WORKSHOPS

For all of our upcoming events, please check out our [website](#) and [events calendar](#).

[Workshop on “Publishing data packages in the EDI repository”, 4 – 6 June 2019, University of New Mexico, Albuquerque, NM.](#)

[Hackathon to continue the development of the Information Management Code Registry, 11 – 13 June 2019, University of New Mexico, Albuquerque, NM.](#)
